

# Do bright Smarties help you or hurt you?

## Plan

What will you compare?

---

---

How will you make sure it is a fair comparison?

---

---

How will you make sure that you don't get what you expect and that you don't act differently when you eat the bright and the dark Smarties?

Person eating the Smarties: \_\_\_\_\_

Person handing out the Smarties: \_\_\_\_\_

How will you make sure that the way you measure what happens after you eat the Smarties is fair?

Person asking questions or measuring: \_\_\_\_\_

Person recording the answers: \_\_\_\_\_

Questions you will ask or how you will measure and decide if the answer is yes or no for:

- A good feeling in your body?
- Draw a straight line quickly?
- Pain in your stomach?
- Dizzy when you stand up quickly?

## Bright Smarties (pink, yellow, blue, green)

X = Yes

O = No

Bright Smarties number	Did you get a good feeling in your body?	Could you draw a straight line?	Did you get a pain in your stomach?	Were you dizzy when you stood up quickly?
